- Collaborated with NGOs on a Menstrual Hygiene Campaign, providing essential education and resources to underserved communities

PROFILE SUMMARY

Experienced Full Stack Developer specializing in Next.js, TypeScript, and modern web architecture. Proven track record building high-performance, scalable applications with measurable impact—including a donation platform that raised ₦2M+. Passionate about clean code, developer experience, and shipping user-first products. Strong advocate for maintainable architecture and cross-functional collaboration.

WORK EXPERIENCE

WealthBridge Financial Services Limited   SEPT 2025- PRESENT
IT Team Lead

- Lead the migration of the corporate website from WordPress to Next.js, improving performance and scalability for long-term maintainability
- Serving as QA Engineer across all software products—web, desktop, and mobile applications—ensuring production-ready releases through comprehensive testing protocols
- Managing general IT operations, troubleshooting technical issues, and implementing UI fixes across multiple platforms
- Collaborating closely with the Chief Senior Developer to align technical decisions, coordinate development workflows, and maintain code quality standards
- Optimizing SEO strategy and implementation, improving search visibility and organic traffic.

Viscorner   APR 2025 - NOV 2025
Web Developer (NEXT.js)

- Played a key role in migrating VisCorner from WordPress to Next.js and Strapi CMS while maintaining the current platform and building new features.
- Built and maintained Next.js applications using best practices for performance, scalability, and accessibility
- Contributed to planning and architecting the long-term technical roadmap of the VisCorner platform
- Collaborated with cross-functional teams to ensure seamless feature rollouts

DITCOSOFT Technologies   MAY 2024 - APR 2025
Web Developer

- Designed and built AirtimePlus-Beta from scratch (beta.airtimeplus.ng), a complete recharge card management platform
- Developed a multi-tenant portal enabling domain-based tenant access with scalable architecture and role-based authentication
- Managed user account systems, pin printing functionality, and pin flushing features
- Enhanced backend connectivity and ensured smooth front-to-backend integration
- Built the company's Cooperative website with modern design principles

Freelancer (various clients)   MAY 2022 - PRESENT

- **Amour Artelia** (amourartelia.com)
- Built and deployed a modern company site powered by Next.js and Sanity CMS, playing a key role in branding and SEO strategy
- **One Divine Singularity** (onedivinesingularity.com)
- Developed a blog with secure admin portal and performance optimization for improved user experience
- **Greencal Foundation** (greencalfoundation.com)
- Designed and delivered a responsive, impact-driven donation platform for a non-profit based in Abakaliki, Ebonyi State—directly contributing to a successful fundraising campaign that generated over ₦2 million for hospital bill clearance
- **PEPNOPS** Inc (pepnops.com)
- Built and deployed a modern corporate website with optimized performance and user experience
- **Zstinger** (zstinger.com)
- Developed an authenticated investor portal for a drone technology firm with secure access controls
- **Performance Achievement:**
- Consistently achieved 100/100 Lighthouse scores (Performance, SEO, Best Practices, Accessibility) for production-grade websites through rigorous optimization and semantic development practices
