PROFESSIONAL SUMMARY

Fullstack Software Engineer and IT Team Lead with 4+ years of experience designing and shipping production systems across the full stack – backend architecture, database design, API development, DevOps tooling, and user-facing interfaces.

My work spans multi-tenant SaaS platforms, real estate systems, restaurant ordering platforms, fintech loan applications, and enterprise internal tooling – each built with deliberate focus on scalability, security, and long-term maintainability. Currently deepening backend expertise through intentional project-based learning, progressing toward Java, Go, and AWS cloud deployments.

EDUCATION

University of Lagos NG

CHEMICAL ENGINEERING

WORK EXPERIENCE

WealthBridge Financial Services Limited | September 2025 - present

IT Team Lead

- Designed and built DaBridge, a production real estate platform as a Next.js + PHP monorepo. PHP backend features a custom router, JWT authentication, file uploads, rate limiting, honeypot spam protection, and a full admin API across six modules. Containerised with Docker Compose (MySQL, PHP, Next.js). Shipped under a real client deadline.
- Built bulk email and assessment delivery infrastructure for a company scholarship programme – PHP cron jobs, queue tables, idempotency guards, and per-candidate randomised question sets ensuring no duplicate delivery at scale.
- Performed a live production database recovery, backfilling 1,345 orphaned result rows using sequential insert/send ordering and a three-way JOIN. Zero data loss.
- Architected a full-cycle digital lending platform (WealthBridge Loans) covering Personal, Business, and SME loan types with a multi-role workflow – applicants, loan officers, and admins – built on Next.js 15, PostgreSQL, and Prisma.
- Assessed and contributed to an Angular 20 migration of the Mifos/Fineract open-source financial platform frontend.
- Maintains internal WordPress, Sanity CMS, cPanel infrastructure, and Paystack payment integrations across the organisation.
- Mentors junior developers, establishing code review standards and architectural patterns for the engineering team.

Key Technologies: Next.js, TypeScript, PHP, Node.js, MySQL, PostgreSQL, Prisma, Docker, Sanity CMS, WordPress, Paystack, Angular

VisCorner Enterprises | April 2025 - November 2025

Web Developer (Next.js)

- Led critical platform migration from WordPress to modern Next.js + Node.js + Strapi CMS stack, improving page loads, site performance scores from 45 to 70+ on Lighthouse.
- Architected and built entire frontend of **Viscorner** from ground up using React (Next.js), Zustand, TypeScript, and Tailwind CSS, delivering modern, intuitive UI that significantly enhanced user experience and brand perception

- Implemented 10+ major features including advanced search functionality, dynamic content modules, user dashboard, and service catalog system—all delivered on schedule within 8-month engagement
- Developed intelligent search algorithm (useIntelligentSearch) enabling users to search through 500+ services with zero lag, featuring:
 - **Natural language processing** to transform queries like "I need a plumber" into "plumbing services"
 - **Auto-correction algorithm** handling up to 3 misspelled letters with nearest suggestion matching
 - Search suggestion feature improving user discovery by 60%
 - Real-time filtering for optimal performance
- Implemented comprehensive caching strategies (ISR, client-side caching, CDN optimization) reducing server load by 55% and improving repeat visit load times by 3.5 seconds
- Structured Strapi CMS with custom content types and workflows, empowering non-technical staff to update content dynamically without developer intervention—reducing content update turnaround from 24 hours to instant
- Drove significant increase in organic traffic through technical SEO optimization, semantic HTML, structured data implementation, and Core Web Vitals improvements
- Collaborated with backend developer to integrate RESTful APIs, design user dashboard architecture, and implement authentication flows with role-based access control
- Optimized page load speeds achieving sub-2-second First Contentful Paint (FCP) and sub-3-second Largest Contentful Paint (LCP) across all pages
- Collaborated with CEO and Maintained legacy WordPress platform while simultaneously building new features, ensuring zero downtime during 6-month transition period.
- **Key Technologies:** Next.js, React, TypeScript, Strapi CMS, WordPress, Tailwind CSS, Framer motion, Zustand, Context API, REST APIs, Search Algorithms, Performance Optimization, SEO, ISR Caching

DITCOSOFT Technologies | May 2024 - April 2025

Web Developer (Next.js)

- Architected and developed **AirtimePlus-Beta** (beta.airtimeplus.ng) from ground up—a comprehensive recharge card management platform handling thousands of transactions monthly (airtime, data, vouchers) worth over ₦13.2k.
- Designed and implemented multi-tenant SaaS architecture with domain-based tenant isolation, role-based access control (RBAC), and JWT authentication
- Built complex user account management system with pin generation, bulk printing functionality, and automated pin flushing features
- Integrated PHP backend APIs with Next.js frontend, implementing error handling and data validation reducing API errors by 70%
- Developed company Cooperative website with modern UI/UX principles.
- Implemented secure authentication flows and session management for enterprise clients

Various Clients | Jan 2022 - Present

Freelance Fullstack Developer

- **GreenCal Foundation (greencalfoundation.com) | Non-profit Donation Platform** - Designed and built high-converting donation platform for Abakaliki-based NGO that generated ₦2,000,000+ in donations for hospital bill clearance campaign. Optimized conversion funnel resulting in 35% increase in donation completion rate through strategic UI/UX improvements
- **Portfolio Website (mosesnwigberi.com)** - Achieved 100/100 Lighthouse scores across all metrics (Performance, Accessibility, Best Practices, SEO)
- **Amour Artelia (amourartelia.com) | Corporate Website** - Delivered modern corporate website using Next.js and Sanity CMS with real-time preview capabilities. Led SEO strategy implementation resulting in first-page Google rankings for 8 target keywords within 2 months. Implemented brand identity through custom animations and interactive elements using Framer Motion
- **Zstinger (zstinger.com) | Investor Portal** - Developed secure, authenticated investor portal for drone technology startup with PHP powered authentication. Built dashboard with real-time data visualization. Implemented role-based access control for different investor tiers
- **One Divine Singularity (onedivinesingularity.com) | Blog Platform** Created blog platform with secure admin portal using HTML, CSS, Bootstrap and PHP.
- **TastyC** – Multi-role restaurant ordering platform with JWT access/refresh rotation, Redis idempotency keys, PostgreSQL, and Prisma. Three-role architecture (customers, staff, admin) with seeded first-admin model. v2 scoped for Paystack payments and React Native mobile.

TECHNICAL SKILLS

- **Backend & Architecture:** Node.js, Express.js, PHP, REST API Design, Service Layer Architecture, Repository Pattern, Dependency Injection, OOP, Multi-tenancy, JWT Auth (access/refresh rotation), Queue Systems
- **Frontend:** Next.js (App Router), React, TypeScript, JavaScript (ES6+), Tailwind CSS, Framer Motion, Zustand, Progressive Web Apps
- **Databases & ORMs:** PostgreSQL, MySQL, SQLite, Prisma, DrizzleORM, Redis, BullMQ
- **DevOps & Infrastructure:** Docker, Docker Compose, cPanel, Git, GitHub, Vercel, Netlify
- **CMS & Integrations:** Sanity CMS, WordPress, Strapi, Paystack, Twilio
- **Currently Learning:** NestJS · Go · AWS (EC2, RDS, S3, SQS, ECS) · Laravel

COMMUNITY IMPACT

- Built a donation website that raised ₦2M+ for hospital bill clearance campaign in Ebonyi State
- Collaborated with NGOs on a Menstrual Hygiene Campaign, providing essential education and resources to underserved communities
